

Chiropractic BioPhysics CBP—The Science of Spinal Health

Module 7. CBP® Hands on Workshop

February 19 – 21, 2016 Eagle, ID

Course Title: Chiropractic Biophysics (CBP®) Hands on Training Workshop

Instructor: Dr. Deed Harrison, Dr. Jason Haas, Dr. Joe Ferrantelli, Jason Jaeger, Dr. Joe Betz

Course Objective: This course provides an integrated education for the Doctor of Chiropractic in the Art of chiropractic techniques for spine and postural abnormalities in today's patient populations. This is a 3 day hands on training designed to test the Chiropractic clinicians' knowledge of CBP® technique and their ability to perform it. Current knowledge in CBP technique adjusting, exercises, and traction procedures will be reviewed. Emphasis is placed on analysis of spine/posture deformities using valid and reliable assessments and then the appropriate adjustive and rehabilitative treatment techniques. An interactive survey of case studies for enhanced learning will be presented.

Total Hours: 16

Friday

4:00pm-6pm

CBP® Technique and Rehabilitation procedures with emphasis on staff and patient responsibilities and communication points

- CBP® Technique and Rehabilitation procedures with emphasis on staff and patient responsibilities and communication points,
- PosturePrint® PostureScreen analysis with hands on training and generated postural displacement findings for each person attending;

1 Hr. CE, Lecture, Principles of Practice

1Hr. CE, Lecture, Examination

6:00pm-8:00pm **Mirror Image Adjusting Using PosturePrint Displacement Findings**

- Mirror Image® adjusting based on PosturePrint® findings. Each attendee will partner up and use Drop Table and Instrument techniques for supervised adjusting setups and demonstrations;

2 Hr. CE/Lecture/Technique-CBP

Saturday

9:00am-12:00

Mirror Image Exercises Using Posture Screen Displacement Findings

- Mirror Image® exercise program structuring and implementation using the PosturePrint® findings of each attendee;
- Each Attendee will implement & perform exercises for rotation and translation displacements of the head, thorax, pelvis, and extremities;

3 Hr. CE/Lecture/Technique-CBP

Noon-4pm

Mirror Image® Lumbar-pelvic Traction

- Each attendee will be given a patient radiograph and postural findings and be asked to perform a setup in various lumbar-pelvic traction devices,
- The details of patient progression throughout treatment will be delineated,
- Indications and contra-indications to each traction type will be delineated.

3 Hr. CE/Lecture/Technique-CBP

1:00-2:00 LUNCH

5:00-7:00

Mirror Image® Thoracic and Full Spine Traction

- Each attendee will be given a patient radiograph and postural findings and be asked to perform a setup in various thoracic and full spine traction devices,
- The details of patient progression through a program of treatment will be delineated,
- Indications and contra-indications to each traction type will be delineated.

2 Hr. CE/Lecture/Technique-CBP

Sunday

8am-11am

Mirror Image® Cervical Spine Traction

- Each attendee will be given a patient radiograph and postural findings and be asked to perform a setup in various cervical spine traction devices,
- The details of patient progression through a program of treatment will be delineated,
- Indications and contra-indications to each traction type will be delineated.

3 Hr. CE/Lecture/Technique

11am-Noon

Management of Sagittal Plane Deformities:

- Indications and contraindications for the use of home orthotics: Denneroll, Compression extension traction wedge, and others.

1 Hr. CE, Lecture, Technique – CBP
